An older but VERY entertaining game that kept interested enough that I actually beat it! At the time of its release, its graphics were top notch and the game play was perfect. An older hidden gem that you can't go wrong with! Most people might be turned off by it being an older game priced at around \$10. While in my opinion it's well worth the price, if you're still not sure just place it on your wish list and wait for it to go on sale. RATING: A. fun game, just didn't come with the friends to play with tho. Excellent Locomotive. Has some great features, cab light, beacon, windows open, etc. Already used this in a couple of scenarios I already had... congratulations!

you guys created something special.

can't wait to see more.. Horrible game Not recommended for \$20 honestly wish i had my money back!. I've always had mixed feelings about the Choice of Games collection. A lot of them are pretty iffy, and this one is especially. I did 2 paths and then decided to stop since it got increasingly tedious. It just feels like nothing really happens and nothing really matters. The characters feel hollow, the stats feel pointless and I couldn't care less about my Gryphon, either. All in all this is one of the weaker games they're offering.

At the very least I'll say it's not as obnoxiously in your face with its political beliefs and agendas as most of these games can be.. Great game, it has the rare combination of music, gameplay difficulty and aesthetics that is hard to find in indie games.

Noticed this in my Steam library and saw that it was a visual novel. Figured I'd check it out. It was honestly really interesting and enjoyable. I liked the soundtrack a lot, too!

Word of warning: If you don't know what visual novels are, they're not like normal games. It's like reading a book, except it includes sounds and some animation, and you get to make a lot of important choices. There are multiple endings you can get, depending on your decisions. Don't get this and expect a different kind of game.. Keeping it simple... Hell No!. Beautiful art and characters. Puzzles are ok and objects clear. Story is very interesting, like movie!. Playin on my other acc. pretty good game tbh, nice graphics and atmosphere.. Better than expected.
